

# The Solution for a Common Electrical Hazard

HILMERSON SAFETY®

## CURRENT COVER™

### The Problem:

- During construction various trades remove plastic receptacle and switch covers to complete painting, wall covering, and related finishing work
- These uncovered receptacles expose workers to electrical hazards and are a direct violation of 1926.405(j)(1)(i)
- Electrical hazards are one of OSHA's most frequently cited violations
- Contractors can face maximum fines up to \$126,749 per violation
